Respondent skipped this question

PAGE 18: Process Measures for Intervention 1 - Prevent HIV/STDs/ Vaccine-Preventable/ Health Care-Associated

Q22: Please select all process measures being used to monitor progress on this intervention (This list represents the most highly recommended process measures included in the Prevention Agenda Action Plans). Check all that apply

Respondent skipped this question

PAGE 19: Data collection for Intervention 1

Q23: How have you used the process measures data that you have collected to make improvements to intervention implementation? Check all that apply

To track progress of intervention implementation (i.e., reaching target population)
,
To engage stakeholders,
To make improvements to implementation of interventions

PAGE 20: Disparities for Intervention 1

Q24: Are you addressing a disparity with this intervention?

Yes

PAGE 21: Disparities Detail for Intervention 1

Q25: Which of the following types of disparities are you addressing? Check all that apply

Income/SES, Disability

Q26: Please describe the activities that you are doing to address disparities:

The NFMHC Health Home is located in the hospital's Medical Office Building and connected to primary care for better collaboration of cases with the primary care providers. The Health Home also has a kiosk station embedded within the Niagara Wellness Connection Center to meet with behavioral health and primary care clients before and after appointments to assist with coordination of care between the client and primary care provider.

In addition, the Health Home has opened an office in Lockport to improve accessibility for clients in the eastern end of Niagara County.

Weekly case rounds are held to discuss cases with medical professional staff and care managers for better coordination of care. Non-NFMHC providers are contacted face to face and by phone, letter and fax to obtain medical orders related to the client.

Medical treatment plans are electronically embedded in the clients' individualized care plans. A paper copy is shared with the client. The care manager plays a pivotal role in ensuring the client receives education and supportive services to promote healthy outcomes.

PAGE 22: Status of Implementation Efforts for Intervention 1

Q27: What is the current status of your implementation efforts related to this intervention? Select only one	On track with implementation schedule
---	---------------------------------------

PAGE 23: Overall Successes and Challenges of Implementing Intervention 1 Strategies

Q28: What have been the successes in implementing Intervention 1? Check all that apply	Identifying burden/problem to be addressed , Defining target population , Developing data collection methods , Establishing clear implementation timelines/milestones
---	--

Q29: What challenges are you facing in the implementation of Intervention 1? Check all that apply	Educating the community about the problem , Reviewing and monitoring progress with partners , Maintaining involvement of the majority of stakeholders at all stages throughout intervention implementation
--	--

PAGE 24: Second Prevention Agenda Priority Area

Q30: What is the second Prevention Agenda Priority Area you are reporting on? Select only one	Promote a Healthy and Safe Environment
--	--

PAGE 25: Intervention 2 - Prevent Chronic Diseases

2015 Prevention Agenda Annual Progress Report - Update

Q31: Within this Prevention Agenda priority area, which Focus Area are you reporting on? Select only one

Respondent skipped this question

Q32: Please select your Intervention 2 (from this list of most highly recommended evidence-based interventions included in the Prevention Agenda Action Plans) furthest along in implementation that you will be reporting on. Select only one

Respondent skipped this question

PAGE 26: Other Intervention 2 - Prevent Chronic Disease
