Community Service Plan  
January 1, 2014 to December 31, 2017  
Submitted November 2013

Overview

Niagara Falls Memorial Medical Center is a 171-bed, full-service acute care hospital in downtown Niagara Falls.

The medical center offers extensive inpatient and outpatient services including a 120-bed skilled nursing and rehabilitation center, four primary care physician practices (Niagara Falls, North Tonawanda, Grand Island and Wheatfield), a suburban outpatient service center (Summit Healthplex/Wheatfield) with laboratory, radiology, rehabilitation, sports medicine and specialty physician services, and a health clinic for members of the nearby Tuscarora Indian Reservation.

Memorial offers several services unique to Niagara County including a diabetes and endocrinology center, inpatient adult behavioral health unit (54 beds), dedicated psychiatric emergency department and the Child Advocacy Center of Niagara, a multi-disciplinary program responding to reports of physical and sexual child abuse.

Hospital Mission Statement

Memorial Medical Center’s mission statement is:

“Improving the health of the Greater Niagara Region with a passion for excellence.”

We strive to improve the region’s health status by positioning ourselves as a community center for health and wellness working collaboratively with scores of community partners. Such collaborative efforts include (but are not limited to):

- A state Department of Health designation as the Health Home for Niagara County. This free program for qualified Medicaid patients is coordinated by a dedicated case manager who helps participants navigate the healthcare system and coordinates referrals to other services.

Our Health Home partners include:
American Red Cross
Buffalo Beacon Corporation - Beacon Center
Buffalo Heart Group, LLP
Buffalo Psychiatric Center
Catholic Charities
Child Advocacy Center of Niagara
Community Care – Blue Cross Blue Shield of WNY
Community Health Center of Buffalo, Inc.
Community Missions of Niagara Frontier, Inc.
Complete Homecare
DaVita Healthcare Partners Inc.
Diversified Hearing Services
Eastern Niagara Health System
Sponsorship of the **Niagara County Healthy Moms/Healthy Babies Coalition**. This coalition of more than 20 social service, healthcare, educational and religious organizations and agencies works collaboratively to improve the health of our community’s moms and babies and to address disparities in adequate prenatal care provided to expectant mothers, the percentage of low birth weight babies born in our community, and high rates of infant mortality.

**Project Runway.** Funded by the Peter and Elizabeth C. Tower Foundation, Project Runway aims to increase community awareness of the issues surrounding substance use and abuse by girls and young women and to train healthcare professionals, including physicians, to effectively evaluate and treat those who use alcohol and drugs. The work plan for this program is based on input received at public sessions held in three different Niagara Falls neighborhoods.

Niagara Falls Memorial Medical Center has been named a provider for **NY State of Health, the state’s In-Person Assistor and Navigator (IPA/Navigator) Program** to help people shop for and enroll in health insurance coverage. In that capacity, Memorial has concluded memoranda of understanding with numerous community organizations and provides IPA/Navigator Assistance at 10 sites across Niagara County.
Definition and Description of Community Served

Niagara Falls Memorial defines its service area as western Niagara County and northern Erie County. The zip codes included in this area are 14072, 14301, 14303, 14304, 14305, 14092, 14107, 14109, 14120, 14131, 14132, 14144, 14172 and 14174.

The service area is a study in contrasts. Niagara Falls (zips 14301, 14303, 14304, 14305), with an estimated 49,722 residents, has a median household income of $32,617 with 21.7% of its residents living below the poverty level (Source: U.S. Census Bureau).

More than 50 percent of Niagara Falls residents receive some form of government assistance and 66 percent of the city school district's population qualified for either free or reduced-price meals during the 2012-2013 school year. Black/African American and Latino/Hispanic residents account for 24.6 percent of the city's population.

The next largest city, North Tonawanda (zip 14120) has 31,269 residents and a median household income of $46,203, with 10.5% of its residents living below the poverty level. More than 96 percent of the city residents are white.

The surrounding towns of Niagara, Wheatfield, Grand Island, Lewiston, Porter and Wilson are predominantly suburban and rural with a significant agricultural presence.

Public Participation

Public participation in the Community Service Plan process was performed collaboratively by a work group comprising the Niagara County Health Department, Niagara Falls Memorial Medical Center, Mount St. Mary's Hospital & Health Center, DeGraff Memorial Hospital/Kaleida Health, Eastern Niagara Health System, Niagara County Department of Mental Health and University at Buffalo Preventive Medicine Residency Program.

Those efforts were facilitated by the P2 Collaborative of Western New York, a not-for-profit organization that works with individuals and organizations in Allegany, Cattaraugus, Chautauqua, Erie, Genesee, Niagara, Orleans and Wyoming counties to improve the health of Western New Yorkers.

- The work group met seven times in an eight month period (March 7, April 9, May 16, July 2, Aug. 27, Sept. 11 and Oct. 3).

- Early in the process the work group conducted a countywide Community Health Survey that was widely publicized through the use of news releases, website postings and in-person community distribution. Survey responses were gathered both online and on paper (hard copy) with 1,455 surveys completed and submitted.

  The five most often identified issues of concern and the associated Prevention Agenda focus areas were:
  
  - Cancer (50.24%) - Prevent Chronic Disease
  - Heart-Related Issues (37.23%) - Prevent Chronic Disease
  - Overweight/Obesity (31.93%) - Prevent Chronic Disease
  - Alcohol/Drugs (27.94%) - Promote Mental Health/Prevent Substance Abuse
  - Nutrition/Healthy Diet (27.32%) - Prevent Chronic Disease/Healthy & Safe Environment.

- Niagara Falls Memorial Medical Center, DeGraff Memorial Hospital and Eastern Niagara Health System also conducted facilitated focus groups in their communities.
Focus group participants at the John Duke Senior Center in Niagara Falls identified the most significant health issues they face as:

- Obesity and the way it’s connected to other health issues for both adults and children
- Heart disease
- Diabetes (especially when uncontrolled in seniors)
- Mental health (particularly dementia)
- Arthritis/joint problems
- Cancer
- Dental care and eye care

These fall under the Prevention Agenda focus areas Prevent Chronic Disease, Promote a Healthy and Safe Environment, Promote Mental Health and Prevent Substance Abuse.

- The countywide work group hosted a community stakeholder meeting (Aug. 14) that was attended by representatives from Opportunities Unlimited of Niagara (a not-for-profit organization providing programs and services to people with mental retardation or developmental disabilities), Niagara County Community College (a two-year college with more than 7,000 enrolled students) and The Dale Association (a not-for-profit human service organization with a comprehensive list of programs and services for adults of all ages) along with the county’s hospitals, Health Department and P² Collaborative.

Attendees identified as their health issues/concerns:

- Patients need help with navigating healthcare system and the resources needed to access information
- A need for additional provider education about how to manage diverse populations (e.g., those with developmental disabilities)
- Development of more collaborative communication and a strong support network
- PTSD
- Diabetes/overweight
- Environmental risks
- Mental health issues – mental illness prevents needed attention to patients’ chronic diseases
- Cancer
- Nutrition

**Assessment and Selection of Public Health Priorities**

On July 2, Niagara County work group participants selected and agreed upon the following priority from the NYS Prevention Agenda:

- **Priority:** Prevent Chronic Disease
- **Focus Area:** Increase access to high-quality chronic disease preventive care and management in clinical and community settings.
- **Disparity:** People with mental health issues

In connection with this shared priority, Niagara Falls Memorial Medical Center has chosen as its objective: By December 31, 2017, increase the percentage of adult health home members diagnosed with both schizophrenia and diabetes whose blood glucose is in good control (hemoglobin A1C less than 8%) by 20%.

Niagara Falls Memorial Medical Center
Rationale:

- The rate of hospitalizations for short-term complications of diabetes (ages 18+ years for the years 2008-2010) is 9.2 per 10,000 in Niagara County compared to 5.6 per 10,000 in New York State. The New York State 2017 objective is 4.8 per 10,000.

- The Niagara County Health Home has a growing number of clients from across Niagara County who have both an acute care (medical) and a mental health diagnosis. A significant percentage of those clients have been diagnosed with schizophrenia.

- People with schizophrenia are at a greater risk of metabolic syndrome due to their serious mental illness. Diabetes screening is important for anyone with schizophrenia or bipolar disorder, and the added risk associated with antipsychotic medications contributes to the need to screen people with schizophrenia for diabetes. (Source: Agency for Healthcare Research (AHRQ) / National Committee for Quality Assurance (NCQA)).

On August 27, the work group reached a general consensus that “Promote a Healthy and Safe Environment” would be a good fit for the second shared priority area.

Most members, including Niagara Falls Memorial Medical Center, agreed that working toward preventing falls among frail elders would be the best way to approach this focus area.

Accordingly, Niagara Falls Memorial will participate in the following shared priority:

- **Priority:** Promote a Healthy and Safe Environment
- **Focus Area:** Injuries, Violence and Occupational Health
- **Goal:** Reduce fall risks among vulnerable populations

In connection with this shared priority, Niagara Falls Memorial Medical Center has chosen as its shared objective: By December 31, 2017, reduce the rate of fall-related hospitalizations in the population aged 65+ by 10 percent to achieve a Niagara County rate of 184.1 per 10,000 residents. The current rate is 221.3 per 10,000 residents.

Rationale:

- Falls in older adults are the leading cause of injury related deaths, hospitalizations and emergency department visits.

- Falls may have serious consequences affecting mobility, mental health and independence.

- Every day in New York State two older adults die and 140 older adults are hospitalized due to falls.

- 60% of adults who are hospitalized due to a fall end up in a nursing home or rehabilitation center. 27% of those who fall suffer a hip fracture.

- Falls account for approximately $1.7 billion in annual hospitalization cost and $145 million in outpatient costs in New York State. (Source: New York State Department of Health CHAI)

- In calendar year 2012, there were 128 inpatient admissions to Niagara Falls Memorial Medical Center that were directly attributed to falls. During the same period, 406 patients presented to the hospital’s emergency department with a fall. Of those, 144 (35.5%) were age 65 or older.

- DeGraff Memorial Hospital and the Niagara County Health Department are using the NYSDOH “Stay Well” program, an evidence-based initiative, to prevent falls. Components of that program...
can be shared with and used by other hospitals who adopt this or similar initiatives.

- The Health Foundation of Western and Central New York has expressed interest in supporting this spread of falls prevention initiatives throughout Niagara County, and a multi-stakeholder work group would be a strong applicant to seek this funding.

## Three Year Plan of Action

### Priority 1: Prevent Chronic Disease

<table>
<thead>
<tr>
<th>Focus Area</th>
<th>Goal</th>
<th>Objective</th>
<th>Activities/Interventions</th>
<th>Partner Responsible</th>
</tr>
</thead>
</table>
| Increase access to high-quality chronic disease preventive care and management in clinical and community settings. | Promote use of evidence based care to manage chronic diseases. | By December 31, 2017, increase the percentage of adult health home members diagnosed with both schizophrenia and diabetes whose blood glucose is in good control (hemoglobin A1C less than 8%) by 20%. | By 12/31/14  
1. Collaborate with Health Home Director to establish baseline hemoglobin A1C data on Health Home patients diagnosed with schizophrenia.  
2. Collaborate with Niagara County Office of Mental Health to identify prevalence of schizophrenia in Niagara County by zip code.  
3. Identify evidence based educational material on diabetes risk in schizophrenic patient population.  
4. Build data base to capture number of Health Home schizophrenic patients with diabetes, in addition to A1C levels.  
5. Establish referral network between Health Home and Niagara Connections Project.  
6. Meet with NCDOH and Niagara County Hospitals on a quarterly basis to assess progress and report data. | NFMMC  
NFMMC  
NCOMH  
NFMMC  
NFMMC  
NFMMC  
NCDOH, Hospitals |
2. Distribute evidence based diabetes education material to diabetic schizophrenic Health Home patients. | NFMMC  
NFMMC  
NFMMC |
|   |   | 3. Distribute evidence based educational material on prevalence of diabetes in schizophrenic patients to NFMMC based primary care and off site locations. |   |
|   |   | 4. Distribute evidence based educational material on prevalence of diabetes in schizophrenic patients to Health Home partners. |   |
|   |   | 5. Provide diabetes and schizophrenia educational material and/or brochures at 4 community outreach events. |   |
|   |   | 6. Hold 3 educational seminars with NFMMC primary care physicians, hospitalists, psychiatrists, residents and medical students. |   |
|   |   | 7. Meet with NCDOH and Niagara County Hospitals on a quarterly basis to assess progress and report data. |   |

By 12/31/2016

1. Continue collecting A1C data on diabetic schizophrenic patients. | NFMMC

2. Continue distributing evidence based diabetes education material to diabetic schizophrenic Health Home patients. | NFMMC

3. Continue distributing evidence based educational material on prevalence of diabetes in schizophrenic patients to NFMMC based primary care and off site locations. | NFMMC

4. Continue distributing evidence based educational material on prevalence of diabetes in schizophrenic patients to Health Home partners. | NFMMC

5. Provide diabetes and schizophrenia educational material and/or brochures at 4 community outreach events. | NFMMC

6. Hold 3 educational | NFMMC
seminars with NFMMC primary care physicians, hospitalists, psychiatrists, residents and medical students.
7. Meet with NCDOH and Niagara County Hospitals on a quarterly basis to assess progress and report data.

By 12/31/2017
1. Continue collecting A1C data on diabetic schizophrenic patients.
2. Continue distributing evidence based diabetes education material to diabetic schizophrenic Health Home patients.
3. Continue distributing evidence based educational material on prevalence of diabetes in schizophrenic patients to NFMMC based primary care and off site locations.
4. Continue distributing evidence based educational material on prevalence of diabetes in schizophrenic patients to Health Home partners.
5. Provide diabetes and schizophrenia educational material and/or brochures at 4 community outreach events.
6. Hold 3 educational seminars with NFMMC primary care physicians, hospitalists, psychiatrists, residents and medical students.
7. Meet with NCDOH and Niagara County Hospitals on a quarterly basis to assess progress and report data.
8. Collaborate with hospitals and community partners to hold a community event and press conference to outline the success and challenges of the priority area.
Priority 2: Promote a Safe and Healthy Environment

<table>
<thead>
<tr>
<th>Focus Area</th>
<th>Goal</th>
<th>Objective</th>
<th>Activities/Interventions</th>
<th>Partner Responsible</th>
</tr>
</thead>
</table>
| Injury Prevention| Reduce falls risks among vulnerable populations                      | By December 2017 reduce the rate of fall-related hospitalizations in the population aged 65+ by 10 percent to achieve a countywide rate of 184.1 per 10,000 residents. | By 12/31/14  
7. Research and review hospital specific data related to falls hospitalizations by 6/14.  
8. Research and review hospital specific data related to falls ER1 visits by 6/14.  
9. Categorize falls data by address to identify patterns at senior housing complexes, etc.  
11. Identify NFMMC and Schoelkopf nursing home fall reduction programs already in place.  
12. Develop a resource listing of falls resources.  
13. Collaborate with NCDOH and Niagara County hospitals to apply for the Match Grant.  
14. Collaborate with NCDOH to receive falls prevention educational material and brochures.  
15. Meet with NCDOH and Niagara County Hospitals on a quarterly basis to assess progress and report data. | NFMMC |

Dissemination of the Plan to the Public

1. Copies of this Community Service Plan will be sent to a number of public facilities in order to make it easily accessible. Those sites include:

   - Niagara Falls City Hall and both city libraries
   - Niagara, Lewiston, Porter and Wheatfield town halls
   - Niagara County Courthouse

2. The Plan will be posted to hospital’s website at http://nfmmc.org/CommunityServicePlan.

3. A release containing the information in steps 1 and 2 above will be sent to all area news media with a request for publication.

Plan for Monitoring

Steps for maintaining engagement with our local partners over the life of this Community Service Plan and the processes that will be used to track progress and make mid-course corrections are outlined in the Activities/Interventions column of the Plans of Action for the listed priorities.
